

# HORIZON 2020

and the "Excellent Science" pillar

European Commission  
Research & Innovation

Research and  
Innovation

# What is Horizon 2020?

## The new European Union programme for research and innovation for 2014-2020

- **Coupling research to innovation**
- **Challenge based**
- **Strong focus on SMEs**
- **Major simplification**

# H2020 scope

**EU Financial  
Regulation**  
**Specific rules  
for participation**

- Covering all H2020 research and innovation actions
- Keeping flexibility where needed.

HORIZON 2020

# Priorities

# € 79 billion from 2014 to 2020

## HORIZON 2020 BUDGET (in current prices)

# H2020 Who is who

4-4%

55 %

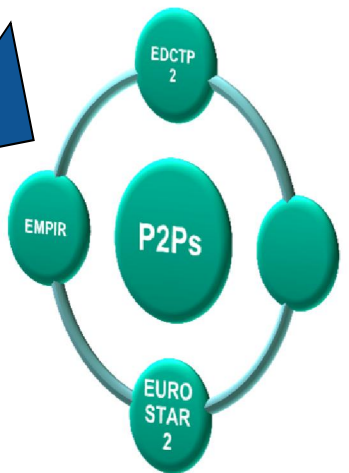

10 %

2 %

HORIZON 2020

# HORIZON 2020

## Work Programmes 2014-2015

Research and  
Innovation

## New approach to work programmes and calls

- **Based on a "strategic programme"**
  - ✓ First Horizon 2020 calls with 12 focus areas
- **Two year work programmes (€ 15 billion)**
  - ✓ Possibility of fine-tuning after the first year
- **Less prescriptive calls (64 calls in 2014)**
  - ✓ Broader and fewer topics
  - ✓ First call deadlines as from March 2014

## Excellent Science Pillar: ~ € 3 B

- **European Research Council** (4 calls) € 1.662 B
- **Marie Skłodowska-Curie actions** (6 calls) € 0.8 B
- **Future and Emerging Technologies (FET)** (4 calls) € 0.2 B

Focus on research beyond what is known, accepted or widely adopted and supports novel and visionary thinking to open promising paths towards powerful new technologies through collaborative interdisciplinary approaches

- **European Research Infrastructures (including e-Infrastructures)** (4 calls) € 0.277 B

Supporting the development of new world-class research infrastructures (e.g. ESFRI) and e-infrastructures and on fostering their innovation potential

## Future and Emerging Technologies (FET) (1/3)

### **FET Open:** radically new future technologies

- High risk visionary science and technology collaborative research projects
- Entirely bottom-up to allow for new ideas
- Risk-friendly and highly interdisciplinary research approach

## Future and Emerging Technologies (FET) (2/3)

### FET Proactive: emerging novel areas

- Emerging novel areas that are not yet ready for inclusion in industry research roadmaps.
- Towards structuring emerging communities and supporting the design and development of transformative research themes.
- A cluster of projects that each address aspects of a research theme and exchange results.

## Future and Emerging Technologies (FET) (3/3)

### **FET Flagship:** large-scale, long-term projects

- Tackle grand science and technology challenges requiring cooperation among a range of disciplines, communities and programmes.
- Science-driven, large-scale, multidisciplinary and built around a visionary unifying goal.
- Strong and broad basis for future technological innovation and economic exploitation, as well as novel benefits for society.

# European Research Infrastructures (1/3)

## Large scale European RIs

- Ensure long-term sustainability and efficient operation of the research infrastructures identified by the European Strategy Forum on Research Infrastructures (ESFRI) and other world-class research infrastructures.
- Open up key national research infrastructures to all European researchers, from both academia and industry, and to ensure their optimal use and joint development.
- Support to global research and education networks providing advanced, standardised and scalable inter-domain ICT services.

# European Research Infrastructures (2/3)

## Innovation potential of RIs

- R&D partnerships with industry to develop EU capacities and industrial supply in high-tech areas.
- Pre-commercial procurement by research infrastructure actors to drive forward innovation and act as early adopters of technologies.
- Stimulate the use of research infrastructures by industry, e.g. as experimental test facilities or knowledge-based centres.
- Encourage the integration of research infrastructures into local, regional and global innovation ecosystems.
- Strengthen the human capital of research infrastructures by training and exchange of staff and by adequate supply of human resources.

## European Research Infrastructures (3/3)

- **Reinforce European policy for research infrastructures, by**

exploiting synergies between national and Union initiatives by setting up partnerships between relevant policy makers and funding bodies.

- **Facilitate strategic international cooperation, by**

the development of global research infrastructures that require funding and agreements on a global scale, and by the cooperation of European research infrastructures with their non-European counterparts.

# **Industrial Leadership Pillar: ~ € 1.8 billion**

Leadership in Enabling and Industrial Technologies (LEITs)

- **Information and Communication Technologies (ICT)**  
(2 calls) € 0.7 B
- **Nanotechnologies, Advanced Materials, Biotechnology and Production** (5 calls) € 0.5 B
- **Space** (5 calls) € 0.128 B
- **Access to Risk Finance (financial instruments)** (2 calls) € 5 M  
(€ 295 M NOT in calls)
- **Innovation in small and medium-sized enterprises** (1 call)  
€ 10 M
- **SME Instrument** € 0.251 B

## **Societal Challenges Pillar: ~ € 2.8 billion**

- **Health, demographic change and wellbeing** (2 calls) **€ 0.6 B**
- **Food Security, Sustainable Agriculture and Forestry, Marine and Maritime and Inland Water Research and the Bioeconomy** (3 calls) **€ 0.3 B**
- **Secure, clean and efficient energy** (4 calls) **€ 0.6 B**
- **Smart, green and integrated transport** (3 calls) **€ 0.54 B**
- **Climate action, environment, resource efficiency and raw materials** (3 calls) **€ 0.3 B**
- **Europe in a changing world – inclusive, innovative and reflective societies** (5 calls) **€ 0.112 B**
- **Secure Societies** (4 calls) **€ 0.2 B**

# EURATOM

**Budget:** €87,87 million in 2014 to support Fission indirect actions

**Duration of the Programme** - 5 years, in line with the Euratom Treaty

## What is new?

- Euratom Programme complements Horizon 2020 and addresses the same key challenges;
- The same rules for participation apply to Horizon 2020 and Euratom Programme;
- A single regulation instead of four separate decisions during FP7

# Horizontal activities

- **Science with and for Society** (4 calls) € 45 M
- **Spreading Excellence and Widening Participation** (3 calls) € 50 M

**Teaming:** associates advanced research institutions to other institutions, agencies or regions for the creation or upgrade of existing centres of excellence.

**Twinning:** strengthen a defined field of research in a knowledge institution through linking with at least two internationally leading counterparts in Europe.

**ERA Chairs:** to attract and maintain high quality human resources and implement structural changes.

# HORIZON 2020

## Simplification

Research and  
Innovation

# Major Simplification for the benefit of applicants

## 1. A single set of rules for all funding under Horizon 2020

- ✓ Fewer, more flexible, funding instruments

## 2. Simpler reimbursement: 1 project = 1 funding rate

- ✓ 100% of the total eligible costs (70% for innovation actions)
- ✓ Non-profit legal entities can also receive 100% in innovation actions
- ✓ Single flat rate for indirect costs (25% of eligible costs)

## 3. Faster time to grant

- ✓ Within 8 months of call deadline

# Major Simplification for the benefit of applicants

- 4. Fewer, better targeted controls and audits**
- 5. Coherent implementation**
  - ✓ Through dedicated agencies
  - ✓ Single IT system
- 6. Simplification in grant agreements**

# Simpler access through the Participant Portal

- **Single entry point** from calls to electronic submission of proposals
- **New tools for smart searches for the benefit of users,** including newcomers to the programme.

# Evaluation criteria

- ✓ **ERC** frontier Research actions >> only EXCELLENCE
- ✓ **Innovation actions** >> higher weighting for "IMPACT"

**Proposal evaluated by the experts "as it is"  
and not as "what could be" = no need for negotiation**

# HORIZON 2020
