

- 1. Download the "eduroam-renyi.crt" file from the following location: <u>https://eduroam-guide.renyi.hu/</u>
- 2. Click the wireless networks icon on the right side of the tray.

3. Choose "Network Connections".

4. Choose the "eduroam" network, then click the cogwheel icon.

Name  V Ethernet	Last Used 🖪	
▼ Ethernet		r

- 6. On the "Wi-Fi Security" tab, set the following parameters:
  - Security: WPA & WPA2 Enterprise
  - Authentication: Protected EAP (PEAP)
  - Anonymous identity: anonymous@renyi.hu
  - Domain: renyi.hu
  - Next to "CA certificate", choose "Select from file", then browse the previously downloaded "eduroam-renyi.crt" certificate (double click on the file to set it)
  - Ensure that the "No CA certificate is required" option is unticked
  - PEAP version: Automatic
  - Inner authentication: MSCHAPv2
  - Username: username@renyi.hu
  - Password: your password
