

COM1A — COMBINATORICS 1A, Spring 2020

Instructor: Dezső Miklós                      Mobile #: +36-30-205-2855

Office: Rényi Institute of Mathematics, ground (first) floor, left of the entrance (via the secreteriat); phone: +36-1-483-8321, e-mail: [dezso@renyi.hu](mailto:dezso@renyi.hu)

Address: V. district, Reáltanoda u. 13-15 (just in the city, very close to ASTORIA subway station)

The two classes on Tuesday and the first class on Thursday will be lectures/practices while the second class on Thursday will be the official office hour. I will have both days further office hours, Tuesday before and Thursday before the classes, from 9am on Tuesday and from 10am on Thursday, so you can see me that time as well. If you still need extra or private office hour you can schedule one calling me — best time is after 6.p.m. The extra office hours will be held in my office at the Rényi Institute.

You will have (most probably) 12 or 13 homework sets, one every week from Tuesday to next Tuesday, each for 8 points, but only the best 10 will be counted. Thus the homework sets contribute 80 points, i.e. 40% to the final grade. There will be one midterm for 48 points or 24% and the final will be for 72 points or 36%. Thus altogether you may get 200 points, but you **definitely do not have to achieve** 100% to get an A. Rather, 80% performance will earn an A, 70% a B and 60% a C for you.

The midterm will be given on the 20th or 24th of March. The final will be scheduled between 18-20 of May, most probably on the 19th.
